

**SPROUTS FARMERS MARKET**

**FRESH & EASY**

**GROCERY / SUPERMARKETS / CONVENIENCE STORES**

Whether it's a new specialty store or an existing supermarket remodel, our team has an extensive background in everything that's unique to today's grocery stores—from refrigeration and fixturing to lifestyle departments and complex podium/roof parking options. We provide the expertise during each phase of a project; including site development, preconstruction design, budgeting, building systems review and construction. Our full-service approach enables us to present best practices for the roll-out of prototype concepts, recommend the most appropriate structural systems for buildings and offer insights prior to bidding that reduce project costs. All of which ensures that forecasted opening dates are met, and in the case of an open store remodel, that strategies are implemented to keep a store functional with minimal disruption; while making certain that safety and compliancy to health requirements are a top priority.
