

MEDICAL

Our comprehensive portfolio features offices and research facilities adhering to the highest standards and environmental regulations. We have developed an in-depth understanding of the healthcare industry and its technically complex MEP and HVAC system requirements through collaborations with well-known medical groups, dental offices, specialty doctors, outpatient clinics, urgent care centers and innovators.

TENANT IMPROVEMENTS

Leveraging 30 years of experience with high-end renovations, we are able to turn-over tenant ready administrative buildings fully-equipped with private offices, break rooms, restrooms, records storage and call centers. Our skilled team of experts and LEED accredited professionals provide the specialized help you need in the design and construction of any interior space; including medical cases, clean rooms, surgery centers, nursing stations, pharmacies, research labs and exam rooms with imaging capabilities.

NORTH COAST MEDICAL

OFFICE SHELLS

We know how to avoid costly pitfalls related to site plan approvals and civil engineering. Involving us during the design-build phase allows us to construct basic structures featuring the latest medical necessities, as well as all associated sitework, landscaping, signage and utilities. Moreover, back-up power, advanced ventilation and adequate resources to dispose of harsh chemicals or hazardous waste can be incorporated to ensure optimum tenant adaptability.
