

## SITE IMPROVEMENTS

Extensive experience with complex sitework projects requiring demolition, underground utilities, parking lot expansions, ADA modifications, hardscapes and landscaping; coupled with a thorough pre-construction process enables us to successfully manage the challenges that often arise ...meeting the most aggressive schedules and complying to highly technical requirements.

**AC TRANSIT BOOTH**

## PUBLIC WORKS

Budgets are a significant consideration when negotiating government contracts; be it at the Federal, State or Local level. These projects are a highly specialized undertaking; encompassing a broad range of specialties including education, medical, municipals and administrative buildings. Our familiarity with their unique contractual requirements, labor codes, civil requirements and additional documentation is our expertise. To that end, we are an approved contractor for a number of school districts and agencies, and the list is always evolving.

## EDUCATION FACILITIES

Whether it's ground-up private campuses or interior modifications to existing public schools, the primary objective is to foster the fulfillment of academic goals without disruption. Our team has the expertise to create state-of-the-art facilities—including theaters, gymnasiums, classrooms, science labs, cafeterias, libraries, performing arts centers, administrative offices, recreation areas and housing—which will be enjoyed by administrators, teachers and students for years to come. We recognize that adherence to special requirements, logistics and fast-track schedules are a necessity to support today's technology-based curriculum and interactive learning environments.
