Judges Statement: *The signature detail of this new science and academic center at a 3,500-student university in San Diego, Calif., is the laser-cut metal screen that graces the front of the building, turning it into a textured beacon at night. But that screen is more than just a showpiece: the perforations create a lovely, dappled indoor-outdoor space that begins to define a series of outdoor circulation paths that give access to the 13 cleanly designed new classrooms and lab spaces. The glazed volumes show rigorous detailing and sit lightly in the landscape, making this a standout.*

Grand Award

**Point Loma Nazarene University
Science Center**

San Diego, CA

Builder: Rudolph and Sletten

Developer: Point Loma Nazarene University

Architect: Carrier Johnson + CULTURE

Award of Merit

**Norma Harrington New Elementary
School**
