

PROJECT SUMMARY

Complete demolition of a first floor tenant space and roof tear off to accommodate a new Comcast facility; complete with all-new offices, tech and training rooms, warehouse space, HVAC, plumbing and electrical. Scope also included sitework modifications for service vehicles and employees parking. Provisions and cosmetic improvements are included for a future currently unoccupied 20,000 sq.ft. second floor tenant space.

- Office
- Tenant Improvements

OFFICE:

- Redwood City

“The virtually new building has received compliments and heartfelt thanks from the COMCAST people who will be working there and all who have seen the finished product. Finishing on time, considering the “surprises” and uncooperative weather encountered along the way is truly amazing.”

Jeremy Spielman, President
