

PROJECT SUMMARY

The facility contains many features unique to a fire station including communication links, vehicle exhaust extraction, special equipment rooms and public access. A comfortable living space was also created for the on-duty firefighters featuring an efficient kitchen, as well as entertainment and exercise areas. Each dorm was outfitted with dedicated heating, ventilating and air conditioning systems, an operable exterior window with integral blinds, personal desks, lighting and storage. Additionally, a glass and aluminum storefront system was specifically created to showcase the department's restored antique fire truck.

Fire Station #11
