

PROJECT SUMMARY

Ground-up 42,000 square foot community center within the active Mariner's Church campus including associated site improvements. A single wall of the existing structure was maintained for entitlement purposes. The new facility features a combination gymnasium / amphitheater, locker rooms, offices, classrooms, food service, and retail spaces. With its extravagant roof design, open window clear story and desired multiple use facility, this project required a design build approach for structural steel, mechanical, electrical, audio/visual and plumbing systems to ensure all systems were thoroughly planned and coordinated from the release of design.

Mariners Church

INDUSTRY: RELIGIOUS CENTER

Renovation and expansion of an existing community center

LOCATION: Irvine
OWNER: Mariners Church
