

PROJECT SUMMARY

First floor modifications included adding small-group classrooms, occupational therapy facility, food service and play area; serving approximately 36 students. The completed project received new exit doors, storefront, roof top HVAC units, light fixtures, fire alarm, cabling, MEP systems and bathrooms. Interior designed specifically for autistic children and young adults (ages 6 to 22). Six classrooms, an occupational therapy gym, several bathrooms, a kitchen, a music therapy space, speech therapy offices, administration offices and common community areas for lectures and training and assemblies were all designed and built to meet the clients needs.

“After being presented with the huge challenge of having to relocate our school for 35 children with autism and 30 faculty and staff within a year’s time, we realize it was only made possible because of the amazing team working on this project. The team was able to work collaboratively with our architects and project manager to build the most amazing school site where students would feel safe and supported as they learn throughout the day.”

Karen Kaplan, Executive Director
